New clinical features are out for your Origin EMR, improving workflow efficiency!

**Patient Profile** :- The patient profile have undergone a facelift and is now, much more simple and intuitive. Information is now consolidated within one screen with flexibility of actions like minimize / maximize, show / hide panels and much more!

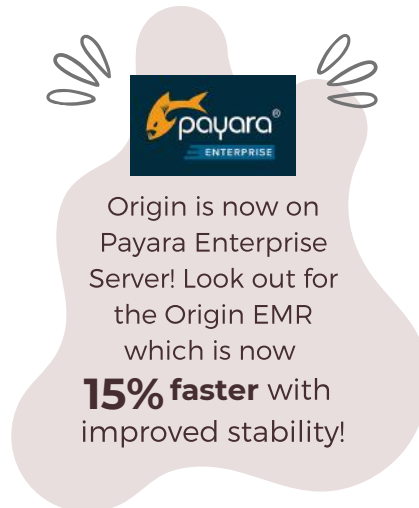

**Site Manager** :- Imagine a platform to take note of lines and drains with individual details and annotate skin condition and / or wounds with relevant details and planned treatment. Meet our new Site Manager who will be able to do just that.

**QR Code charging station** :- Simplified rapid charging module for inventory and services. Able to help nurses and end users to charge items within the hospital in a much more efficient manner.

**Appointment** :- The appointment module have undergone a facelift. Patient name and scheduled time is now listed on the calendar.

Origin is now on Payara Enterprise Server! Look out for the Origin EMR which is now **15% faster** with improved stability!
