(X PARK SUNWAY SERENE)

TEAM BUILDING ACTIVITIES

Company Annual Dinner

Summer Residence At Rainforest Sanctuary

ORIGAMI WORKSHOP

Auspicious Japanese Peacock

Prosperity Koi Fish

LATEST RELEASES

Successful Integration to Passport Reader

	WITH RFID	WITHOUT RFID
IMAGE THAT WILL SHOW IN HIS	Raw and clear image	Scanned image
DATA ABLE TO RETRIEVE	- Raw passport image - MRZ - Biometric data (for authentication) - Passport number - Passport Issue Date and Time	- Scanned passport image - MRZ - Issue Country - Type - Passport Number - Name - Nationality Code - ID Number - DOB - Sex - Passport Expiry Date - Surname - Document Type
PROCESS TIME	20 – 30 SECONDS	13 – 14 SECONDS
STEPS	1. Scan Passport on Origin HIS. 2. Passport reader will scan & read the passport 3. Once scanning is done, HIS side will convert data into readable format 4. Patient data will then populate into related fields on Origin HIS	
ADVANTAGES	- Able to get clear passport image	- Provide core and important data - Suitable for most of the countries, because it only scan, not require any other technology
DISADVANTAGES	- Less information, only the raw image is contributing	- Technology Gap: Some countries might not implement the RFID technology in passport or use different RFID chip which might affect the outcome - Scanned version of passport image
