16 June 2023

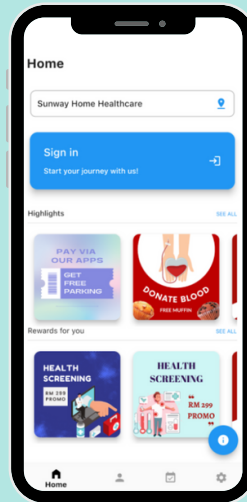

A great time completing an Escape-the-Room Challenge

Release Highlight Patient App Version 1.0

1. Main Page

Upon launching the Patient App, the initial step for the user is to select a hospital. Instead of scrolling through a long list, you can simply search for your preferred hospital by its name.

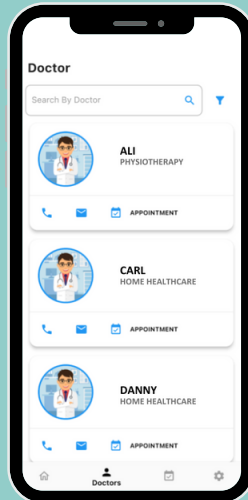

2. Landing Page - Home

Upon hospital selection, user will be directed to the home page. The home page displays personalized rewards, promotions, and articles. Users can view their current hospital and switch if needed. An explicit button will be available to encourages anonymous users to sign in or sign up.

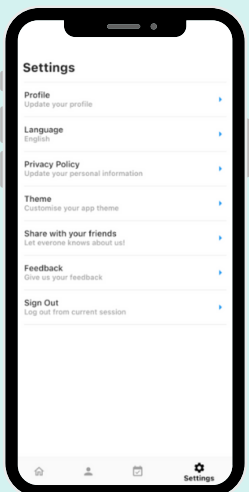

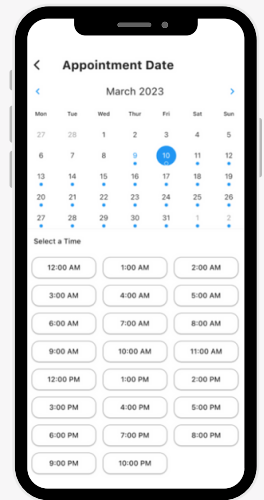

3. "Doctors" Tab

Clicking on the "Doctors" tab reveals a list of available doctors, filtered based on the selected hospitals. Users can filter the list by specialty to refine their search further.

4. Appointment

Once the user selects a suitable doctor, they can proceed to schedule an appointment by viewing the doctor's schedule and available timeslots. To save the appointment booking, users are required to log in to their account.

5. Setting

Within the settings tab, user can access their profile and adjust various app-related settings.

**Upcoming version 1.0 updates
with Queue Management and
Patient Records**
